Ref: Beech Island Water System Upgrades

This notification is to inform you that beginning mid-January 2025, Beech Island Rural Community Water District (BIRCWD) will be initiating a project for water system improvements and upgrades that include the replacement of existing underground water lines and installation of new fire hydrants to the system. The estimated completion of the project is August 2025.

The specific areas impacted by these upgrades will extend from 480 Beech Island Avenue and continue to Highway 125, to include areas adjacent to Beech Island Avenue. Every effort will be made to minimize any negative impact on system operations, however, over the course of the project you may experience periodic low water pressure or temporary water loss as work crews are disconnecting/reconnecting water lines within the system.

As we begin this project, for the safety of all, we ask that all residents and customers exercise caution when traveling in these areas as there will be heavy equipment and personnel present during the performance of this work.

Beech Island Water appreciates your patience and understanding as we work to improve the quality of our services to you, the customer. Should you have any questions you may call the office during normal business hours.
